

## QA Engineer (Junior – BG)

WeTrack helps sports, events and venues all over the world to deliver better events and operations. The industry-leading platform facilitates different aspects of complex operations, including Project and Risk Management, Sustainability Tracking, Readiness and Checks, Run Sheets / Daily Schedules, and Incident Management, and is used by global brands such as FIFA, IOC, ICC, Wimbledon, Expo 2020 Dubai, FIA, Ascot Racecourse, and many more.

WeTrack is a critical operational tool for its users and delivering secure and stable code is central to everything we do. Now we are looking for a Junior QA Engineer to help make that happen by bringing valuable experience in manual testing. This role will offer the chance not only to help to drive our testing moving forwards, but also help to shape the wider QA team and strategy.

### Requirements

- At least 1 year proven experience in manual testing
- Practical knowledge in software testing methodologies, testing types and concepts
- Solid understanding of agile development process
- Experience with issue tracking systems
- Very good command of English
- Sharp attention to detail
- Strong analytical and problem-solving skills
- A team player with communication skills and a healthy desire for collaboration
- Proactiveness and creativity

### Responsibilities

- Design, create and execute manual test cases
- Investigate client reported problems
- Analyze requirements
- Log new bugs and verify fixed bugs on already developed system
- Explore our product in order to identify possible problems

### Nice to have

- Basic knowledge of how the web works
- Basic SQL knowledge

### What we offer

- Competitive salary
- Company share option scheme
- Challenging project and the chance to work with cutting edge technologies
- Dynamic, friendly, international working environment
- Standard working hours
- Choice of working from office in Sofia or remote
- Knowledge sharing and mentorship
- An access to an online education platform
